

Experiment No : 04

Experiment Name : Write a program to determine the Largest number between two values.

```
1 #Experiment Name : Weite a program to determine
2 #.....Code start.....
3 A = int(input("Enter Your First number:"))
4 B = int(input("Enter your Second number:"))
5 #use if,else program
6 if(A>B):
7     print("largest",A)
8 else:
9     print("largest Number=",B)
10 #.....Code end.....
```

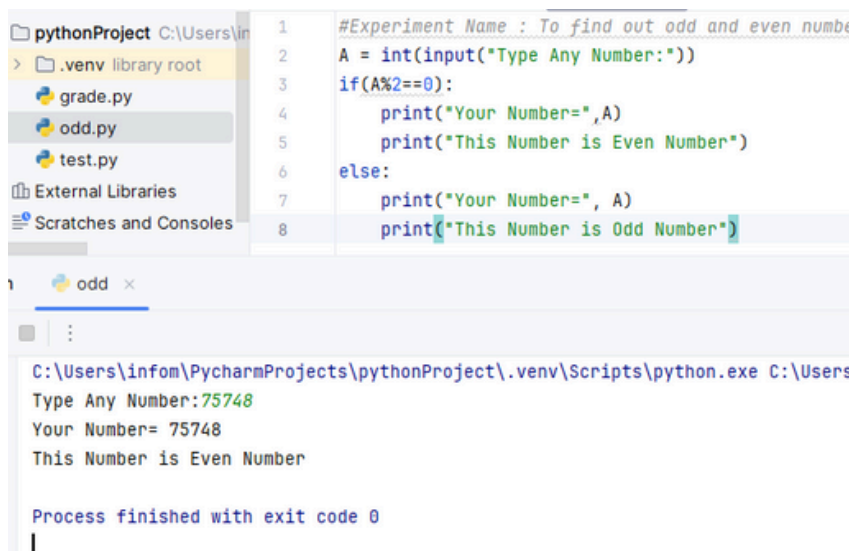

Run test

```
C:\Users\infom\PycharmProjects\pythonProject\.venv\Scripts\python.exe C:\User
Enter Your First number:4534
Enter your Second number:8976
largest Number= 8976

Process finished with exit code 0
```

Experiment No : 05

Experiment Name : To find out odd and even number by using python program.

```
1 #Experiment Name : To find out odd and even numbe
2 A = int(input("Type Any Number:"))
3 if(A%2==0):
4     print("Your Number=",A)
5     print("This Number is Even Number")
6 else:
7     print("Your Number=", A)
8     print("This Number is Odd Number")
```

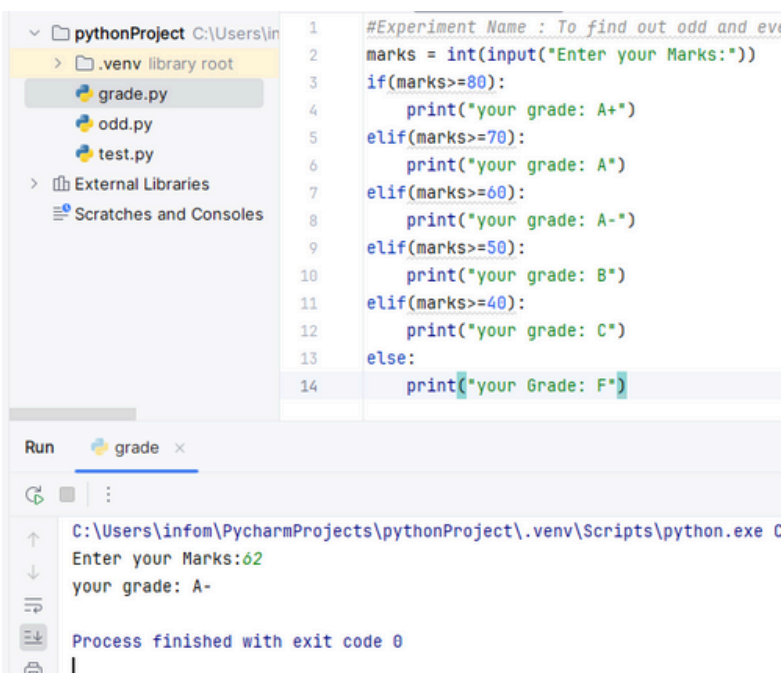

Run odd

```
C:\Users\infom\PycharmProjects\pythonProject\.venv\Scripts\python.exe C:\Users
Type Any Number:75748
Your Number= 75748
This Number is Even Number

Process finished with exit code 0
```

Experiment No : 06

Experiment Name : To implement a program for grading system using python program.

```
1 #Experiment Name : To find out odd and evi
2 marks = int(input("Enter your Marks:"))
3 if(marks>=80):
4     print("your grade: A+")
5 elif(marks>=70):
6     print("your grade: A")
7 elif(marks>=60):
8     print("your grade: A-")
9 elif(marks>=50):
10    print("your grade: B")
11 elif(marks>=40):
12    print("your grade: C")
13 else:
14    print("your Grade: F")
```

Run grade

```
C:\Users\infom\PycharmProjects\pythonProject\.venv\Scripts\python.exe C
Enter your Marks:62
your grade: A-
```

Process finished with exit code 0
